

Total solution, we guarantee it!

Are guest complaints about high or low temperature giving you a headache? PAFMAC units are internally equipped with fan coil and heat pump, giving you comfort through AC all year round. All you need is to switch from the conventional 2 pipe fan coil to PAFMAC unit to deliver heating when receiving cold water, and also cooling when receiving hot water from your district.

Conversion starting from just 1 room

Upgrading plans will vary depending on the owner's perspective, from creating one VIP guest room to all rooms. The installation will only require minimal number of out-of-order rooms.

96% reduction of AC related complaints

Number of complaints during PAFMAC installation

Type of AC	2 Pipe fan-coil	PAFMAC
Complaints per year	499	9
Guest Rooms	672	231
Monthly Average	6.10%	0.30%

Further details appeared in an academic journal

PAFMAC

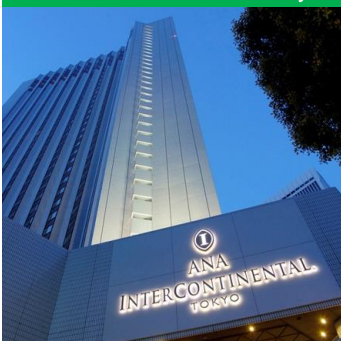

Duration of installation and out of order rooms (results vary due to each situation)
