

PAFMAC

Sometimes the most important feature of a room can't be seen.

Give your guests complete control of something they can't see but definitely feel...the temperature of the room. PAFMAC turns existing 2 pipe fan coil systems into a true climate control experience. These quiet, energy-efficient PAFMAC systems can be installed room by room, without system-wide interruption meaning less down time during renovation. See for yourself what PAFMAC can do for your hotel.

Contact us today to discuss a full trial at your hotel.
